# About CORPAL

CORPAL is a company specialising in the manufacture and marketing of packaging for logistics and offers innovative and environmentally friendly products.

Its experience in packaging for logistics and its dedicated equipment make CORPAL one of the leaders in this field.

Based in the heart of Audomarois, Corpal's products are marketed both in France and Europe.

Created by a subsidiary of a Scandinavian Group that started up in 2006, CORPAL has been part of the French Bulteau Développement Group since 2018 (specialising in the distribution and manufacture of packaging products).

## Sustainable development

Let's help preserve our planet.

CORPAL is completely committed to an approach that aims to preserve the environment, both in our choice of the raw materials used for our products and in the processes we use to manufacture them.

The majority of the CORPAL range is made from recycled paper, and 100% of our products are recyclable. Products made from virgin fibre are made from paper manufactured from thinnings from sustainably managed forests.

We do not discharge any effluent during our manufacturing processes, and all of our waste is recycled via a short cycle that is fully in line with a circular economy approach.

Our commitment to the use of sustainable resources has been formally recognised by our FSC® certification, obtained in 2011.

## Our CARRY solutions

What if we could help you to do without wooden pallets!

### TECPAL

Cardboard pallet

**A very strong cardboard pallets**

The TECPAL cardboard pallet is the ideal replacement for you to adopt when using wooden pallets causes you constraints, and you want to lessen your impact on our environment.

### PALINOV

Pallet foot

**An alternative to wooden pallets**

The PALINOV is the only cardboard pallet foot on the market that combines lightness and a high level of mechanical performance. It is used to replace pallet feet and/or wooden pallets or any other type of pallet.

### SLIP SHEET

**The best solution for the Export Supply Chain**

The SLIP SHEET is your solution for shipments in shipping containers: an excellent alternative to wooden pallets, the SLIP SHEET allows you to eliminate the use of pallets, optimise your loading within the container and exempts you from the limitations of using wood for export (no need for ISPM 15 treatment).

## Our PROTECT solutions

Your products are valuable: we can help you help to protect them

### EDGE COR

Corner protector

**Protect, consolidate and strengthen**

Whether it is for protection against crushing, stability reinforcement or to increase vertical compression strength, our range of Edgecor corner protectors, horizontally or vertically, will adapt to meet your requirements and provide you with the best protection solution.

### FLEX COR

Flexible corner protector

**The ideal protection for cylindrical shapes**

Perfectly adapted for cylindrical shapes, this Flexcor corner protector offers you the best possible protection for the circumference of your products. Easy to fit and available in long lengths, it will meet your packing needs perfectly.

### UCOR

U profile

**Built-in protection for your corners and edges**

Designed for the complete protection of your fragile corners and edges, Ucor profile adapts precisely to your dimensional requirements. Quick and easy to install thanks to the extremely convenient gripper effect. Ucor profiles can also be used as a box for your long products by interlocking two Ucor profiles one on top of the other.

### FLAT COR

Cardboard edge guards

**Protective spacer**

This spacer allows you to eliminate damage caused by impacts or friction of your products, for example between lacquered aluminium profiles or sheets of wood or metal.

## OTHER solutions

When the qualities of our products can lead to another use

### DISPLAY COR

Build single-material POS

Displaycor was developed to replace traditional accessories made of wood, plastic or metal, and used in corrugated cardboard displays.
