

OTHERS Solutions

When the qualities of our product can lead to another use.

DISPLAYCOR

Build 100% recyclable single-material POS materials

Affordable

Recyclable

Replaces wooden fittings

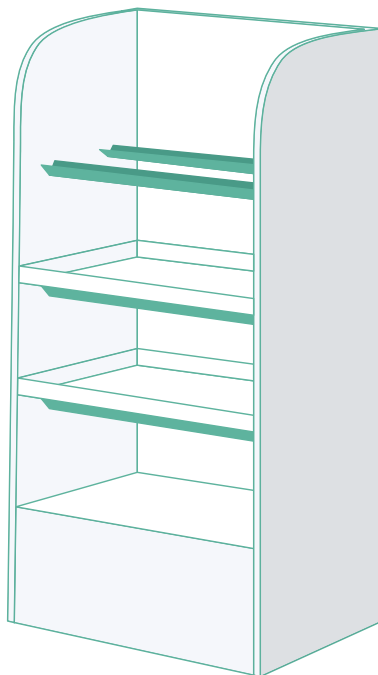

FSC®

DISPLAYCORS have been developed to replace traditional accessories made of wood, plastic or metal, and used in corrugated cardboard displays. They are made from recycled paper, and this allows us to offer you single-material and 100% recyclable POS displays.

The length of Displaycors is totally adaptable to suit the dimensions of your POS displays, and in fact, the creativity and technical solutions developed by your Design Offices are no longer limited by the standard size of traditional accessories.

Benefits features

- > 100% recyclable
- > Allows you to make single-material POS displays
- > Disposal of end-of-life POS products is simplified
- > Adapts to the design of the POS product
- > Numerous sizes available | Lengths cut to order
- > Options : coloured or printed, FSC® certified

The POS no longer has to be adapted to suit the accessory, the accessory adapts to the POS! End-of-life disposal of Displaycors is simplified at the point of sale : the unit can be placed in the paper/cardboard bin without any need to separate the various components as is the case for wooden, plastic or metal accessories.

Because of its manufacturing process, prototyping your POS is easier because the production of Displaycor samples is quick and easy. Don't hesitate to incorporate these new accessories into your designs because they are innovative, they help to preserve the environment and they differentiate your product from traditional designs.

The mark of responsible forestry

Other sizes : please contact us

Options

COLOR

Paper exterior in
natural, white

Displaycors can also be
covered with paper with
a full flat tint to work in
harmony with the look
of your POS displays.

Technical specifications

Choose your Displaycors and their thickness according to :

- > The weight to be supported
- > The nature of the task
- > The length of Displaycor

We always recommend you carry out some tests with standard sizes to confirm the choices you make.
